RUBY CHOCOLATE

So far, there have been only three types of chocolate known to the whole world – milk, dark and 80 years ago white chocolate was introduced. However, times are changing and the world leading Swiss chocolate producer, Barry Callebaut, has developed and created an absolutely unique ruby chocolate! Our family company Steiner & Kovarik has the exclusive privilege to make the highest quality products from Ruby chocolate for you.

Secret of the Ruby chocolate taste

Ruby chocolate comes from special Ruby cocoa beans and by means of the unique processing by the company Barry Callebaut it maintains the most natural sensuous taste and ruby-tinted colour naturally present in the beans. The chocolate is not bitter, milk or much sweet. It will win your heart with its mildness, fineness and at the same time with its sensual intensity which will wake up and please your taste buds. No other cocoa beans or colouring are added while making our luxurious Ruby chocolate products. We choose only the highest quality ingredients and thanks to that our chocolate products belong among the best.
